IBL 2305
Software Design and Development laboratory practical

WEEK 2: 11th October 2021

AGILE SOFTWARE DEVELOPMENT

1.0 Agile Methodologies

What is Agile?

Agile is an iterative approach to project management and software development that helps teams deliver value to their customers faster and with fewer headaches. Instead of betting everything on a "big bang" launch, an agile team delivers work in small, but consumable, increments. Requirements, plans, and results are evaluated continuously so teams have a natural mechanism for responding to change quickly.

1.0 Agile Methodologies

Read the following articles to familiarize yourself with Agile

- https://www.atlassian.com/agile
- https://www.atlassian.com/agile/manifesto
